

## DELTA DAS – Ball detent safety couplings and safety hubs

Precisely adjustable limiting torque, backlash-free, with high repeat accuracy and short response times due to the new rolling key in the detent system. Maintenance-free, available in ratchet design (DK) or synchronous design (SK).

### DELTA DAS-F with mounting flange

- Form-locking overload system
- For engagement torques up to 1,200 Nm
- Available in ratchet design (DK) or synchronous design (SK)

### DELTA DAS-K with integrated sprocket

- Form-locking overload system
- For engagement torques up to 1,200 Nm
- Available in ratchet design (DK) or synchronous design (SK)

### DELTA DAS-F with torsionally flexible jaw coupling

- Form-locking overload system
- For engagement torques up to 1,200 Nm
- Available in ratchet design (DK) or synchronous design (SK)
